

KAYSERİ MUNICIPALITY

To this day, citizens were only viewer in local governments' city information system projects, with CitySurf Web 2.0 Project of Kayseri Municipality, citizens become more than a viewer and they are now a part of the project.

CitySurf Web 2.0 in Kayseri enables citizens to convey their requests online to the administration thus the project helps realization of the true democratic city information system with citizen participation during decision making.

In DPT's (Government Planning Agency) Action 66 Plan, the agency states the primary target of the E-transformation in local governments should be providing the opportunity to the citizens of joining the decision making process. Kayseri Municipality realizes this target with its CitySurf Web 2.0 Project.
